

MOORE FARMS

botanical garden

Job Details

Salary

\$40k and up depending on experience

Job Type

Full-time, year-round

Full Job Description

About

Moore Farms was founded in 2002. Being a relatively new botanical garden, we are looking to advance and develop our land as well as expand our garden and its impact. This dynamic 65-acre garden is set in the rural Pee Dee region near Lake City, South Carolina. Embracing its southern pastoral setting through an informal, expressive design scheme, the garden is a careful blend of exuberant plant displays, bounding meadows and enduring vistas of grey-green pines. Woven throughout this aesthetic tapestry are innovative research, educational programs and community outreach. The resulting union of art and scholarship is a dazzling example of the modern botanical garden.

Moore Farms Botanical Garden is wildly beautiful, creative and soulful; a place of both inspiration and comfort, where plants rule and there is a feeling of discovery, a sense of hitting upon something that others haven't.

Duties

The Horticulturist is responsible for leading the design, care, maintenance and interpretation of the gardens.

Responsibilities

- Design, implement, and care for landscapes.
- Daily duties include weeding, planting, pruning, mulching, light irrigation, and general care of the grounds.
- Ensure equipment is maintained.
- Respect safety standards of the company and maintain a clean work environment.
- Ability to work unsupervised and with other team members.
- Engage with guests for tours as well as educational opportunities.
- Participate in Summer Internship mentoring and guiding in garden maintenance
- The Director of Horticulture works alongside our team to implement our vision for success. 75%-90% of their time will be spent boots on ground actively working, coaching, and facilitating project success.
- The remaining 10%-25% of the time is dedicated to planning, managing and administrating be it in meetings collaborating across departments, project planning, sourcing materials or otherwise.

Qualifications and Education Requirements:

- Bachelor's or Associate degree preferred in Horticulture, Botany, Ecology, Plant Science, or other closely related field.
- 1-5+ years of experience preferred.
- Extensive knowledge of plant material and horticultural practices.
- Experience leading a team of professionals and planning projects.
- Strong work ethic supported by commitment and follow-through.
- Passion for pioneering alternative landscape strategies.
- Excellent communication and interpersonal skills.
- A strong ability to prioritize and balance multiple projects effectively.
- Comfortable working in extreme weather fluctuations.
- Ability to lift 50 pounds.
- Ability to work outside doing manual tasks without reasonable assistance.
- Ability to operate hand tools and/or powered equipment.
- Ability to pass background check.
- Comfortable and competent with Microsoft Office Suite.

Benefits:

- 401(k)
- Employee discount
- Flexible schedule
- Health insurance
- Disability insurance
- Life insurance
- Paid time off
- Vision insurance

Schedule:

- 8-hour shift, overtime may be required
- 7am-4pm
- Day shift
- Monday to Friday
- Weekend availability

Work Location: In person
